## 👤 Profile

Software Engineer with a proven ability to adapt in both self- starting and collaborative environments while staying focused on achieving high-quality results under strict deadlines. Eager to obtain a challenging position at a prestigious company that will expand my learning and build upon my developer skills. Well organized with strong problem-solving skills and the ability to work in both teams and independently.

## 👜 Professional Experience

2022/07 – present

### Associate Developer

Chennai, India

*Amtex Software Solutions Pvt. Ltd.*

- Designed and implemented annexures as part of the project's frontend development.
- Developed validation mechanisms to ensure data integrity and user input correctness for the annexures.
- Integrated the annexure functionality with the corresponding APIs, enabling seamless data communication between the frontend and backend systems.
- Collaborated with the backend team to define and implement API endpoints required for the annexure feature.
- Conducted rigorous testing and debugging to identify and fix any issues or bugs related to the annexure functionality
- Worked closely with the UX/UI team to ensure a user-friendly and visually appealing design for the annexures.

- Contributed to the overall frontend development efforts, including responsive layout design, performance optimization, and cross-browser compatibility

### **Document Specialist**

Puducherry, India

*JPM Services*

- Establish and maintain a systematic approach to document organization, version control, and storage.
- Develop and implement document management processes to improve efficiency and accessibility.
- Ensure that documents are properly categorized and stored in accordance with company policies.
